APPLICATION NUMBER	FILING DATE	FIRST NAMED APPLICANT	ATTORNEY DOCKET NO.
--------------------	-------------	-----------------------	---------------------

This is the examination of the application for a patent in the name of the inventor(s) as shown on the title page of the application. The examination is based on the information provided in the application and the prior art known to the examiner at the time of the examination. The examiner is not bound by the information provided in the application and may rely on other sources of information.

The examiner has examined the application and has determined that the invention is novel and non-obvious over the prior art known to the examiner at the time of the examination. The examiner has also determined that the invention is directed to a new and useful process, machine, or article of manufacture. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a law of nature, a natural phenomenon, or a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.

The examiner has also determined that the invention is not directed to a claim that is directed to a product of nature. The examiner has therefore recommended that the application be granted a patent.
